

## II.

### INTERCONNECTION AGREEMENT TERMS AND CONDITIONS

This Interconnection Agreement for Net Metering Facilities (“Agreement”) is made and entered into this \_\_\_\_ day of \_\_\_\_\_. 20\_\_\_\_, by Clarksville Connected Utilities (“Utility”) and \_\_\_\_\_ (“Customer”), a \_\_\_\_\_ (specify whether corporation or other), each hereinafter sometimes referred to individually as “Party” or collectively as the “Parties”. In consideration of the mutual covenants set forth herein, the Parties agree as follows.

**Section 1. The Net Metering Facility** – The Net Metering Facility meets the requirements of AR Code Ann. 23-18-604 and the terms and conditions set forth in this Agreement, the Net Metering Rules, and the Utility’s applicable rates.

**Section 2. Governing Provisions** – The parties shall be subject to the provisions of AR Code Ann, 23-18-604 and the terms and conditions set forth in this Agreement, the Net Metering Rules, and the Utility’s applicable rates.

**Section 3. Interruption or Reduction of Deliveries** – The Utility shall not be obligated to accept and may require customer to interrupt or reduce deliveries, when necessary, in order to construct, install, repair, replace, remove, investigate, or inspection of any of its equipment or part of its system; or if it reasonably determines that curtailment, interruption, or reduction is necessary because of emergencies, forced outages, force majeure, or compliance with prudent electrical practices. Whenever possible, the Utility shall give the Customer reasonable notice of the possibility that interruption or reduction of deliveries may be required. Notwithstanding any other provision of this Agreement, if at any time the Utility reasonably determines that either the facility may endanger the Utility’s personnel or other persons or property, or the continued operation of the Customer’s facility may endanger the integrity or safety of the Utility’s electric system, the Utility shall have the right to disconnect and lock out the Customer’s facility from the Utility’s electric system. The Customer’s facility shall remain disconnected until such time as the Utility is reasonable satisfied that the conditions referenced in this Section have been corrected.

**Section 4. Interconnection** – Customer shall deliver the privately produced energy to the Utility at the Utility’s meter.

Utility shall furnish and install a meter capable of net metering. Customer shall install a Utility furnished meter socket for the Utility’s meter and any related interconnection equipment per the Utility’s technical requirements, including safety and performance standards.

The customer shall submit a Standard Interconnection Agreement to the electric utility at least thirty (30) days prior to the date the customer intends to interconnected the net metering facilities to the utility’s facilities. The Standard Information, Sections 1 through 4 of the Standard Interconnection Agreement must be completed for the notification to be valid. The customer shall have all equipment necessary to complete the interconnection prior to such notification. If mailed, the date of notification

shall be the third day following the mailing of the Standard Interconnection Agreement. The electric utility shall provide a copy of the Standard Interconnection Agreement to the customer upon request.

Following notification by the customer as specified in requirements for Initial Interconnection, the Utility shall review the plans of the facility and provide the results of its review to the customer within 30 calendar days. Any items that would prevent parallel operation due to violation of applicable safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

To prevent a net metering customer from back-feeding a de-energized line, the customer shall install a manual disconnect switch with lockout capability that is accessible to utility personnel at all hours.

Customer shall not commence parallel operation of the net metering facility until the net metering facility has been inspected and approved by the Utility and all required signatures are acquired by completion of Part III of this agreement (standard Information & Certification). Such approval shall not be unreasonably withheld or delayed. Notwithstanding the foregoing, the Utility's electrical system should not be construed as an endorsement, confirmation, warranty, guarantee, or representation concerning the safety, operating characteristics, durability, or reliability of the Customer's net metering facility.

Modifications or changes made to a net metering facility shall be evaluated by the Utility prior to being made. The Customer shall provide detailed information describing the modifications of changes to the Utility in writing prior to making the modifications to the net metering facility. The Utility shall review the proposed changes to the facility and provide the results of its evaluation to the Customer within thirty (30) calendar days of receipt of the Customer's proposal. Any items that would prevent parallel operation due to violations of applicable safety standards and/or power generation limits as described herein shall be explained along with a description of the modifications necessary to remedy the violations.

**Section 5. Maintenance & Permits** – The customer shall obtain any governmental authorizations and permits required for the construction and operation of the net metering facility and interconnection facilities. The Customer shall maintain the net metering facility and interconnection facilities in a safe and reliable manner and in conformance with all applicable laws and regulations. CCU recommends that the Customer have an annual inspection be completed at the expense of the net metering facility owner. If an inspection is completed in shall be signed by both the Electrical Inspector and net metering facility owner and filed with Clarksville Connected Utilities. At any time if a safety inspection reveals, or the Utility identifies an unsafe condition at the net metering facility, said customer and the City Inspector will be notified and at the customers expense a licensed installer shall be secured to complete the necessary repairs as soon as practical. If the City Electrical Inspector deems immediate repair a necessity to remain operational, said net metering facility shall be switched off until the owner has made satisfactory repairs.

**Section 6. Access to Premises** – The Utility may enter the Customer's premises to inspect the Customer's protective devices and read or test the meter. The Utility may disconnect the interconnection facilities without notice if the Utility reasonably believes a hazardous condition exists and such immediate action is necessary to protect persons, or the Utility's facilities, or property of the

others from damage or interference caused by the Customer's facilities, or lack of properly protective devices.

**Section 7. Indemnity and Liability** – Each party shall indemnify the other party, its directors, officers, agents, and employees against all loss, damages expenses and liability to third persons for injury to or death of persons or injury to property caused by the indemnifying party's engineering design, construction ownership or operations of, or the making of replacements, additions or betterment to, or by failure of, any of such party's works or facilities used in connection with this Agreement by reason of omission or negligence, whether active or passive, the Indemnifying party shall, on the other party's request, defend any suit asserting claim covered by this indemnity. The indemnifying party shall pay all costs that may be incurred by the other party in enforcing this indemnity. It is the intent of the parties hereto that, where negligence is determined to be contributory, principles of comparative negligence will be followed and each party shall bear the proportionate cost of any loss, damage, expense and liability attributable that party's negligence.

Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to or any liability to any person not a party to this Agreement. Neither the Utility, its officers, agents or employees shall be liable for any claims, demands, costs, losses, causes of action, or any other liability of any nature or kind, arising out of the engineering, design construction, ownership, maintenance or operation of, or making replacements, additions or betterment to, the Customer's facilities by the Customer or any other person or entity.

**Section 8. Notices** – All written notices shall be directed as follows:

Clarksville Connected Utilities  
Attention: Electric Department Manager  
P.O. Box 1807  
400 West Main Street  
Clarksville, AR 72830

Customer notices to Utility shall refer to the Customer's electric service account number set forth Section 1 of this Agreement.

**Section 9. Term of Agreement** – The term of this Agreement shall be the same as the term of the otherwise applicable standard rate schedule. This Agreement shall remain in effect until modified or terminated in accordance with its terms or applicable regulations or laws.

**Section 10. Assignment** – This Agreement and all provisions hereof shall inure to and be binding upon the respective parties hereto, their personal representatives, heirs, successors, and assigns, The Customer shall not assign this Agreement or any part hereof without the prior written consent of the Utility, and such unauthorized assignment may result in termination of this Agreement.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives.

Dated this \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_.

### III.

## STANDARD INFORMATION & CERTIFICATION

### Section 1. Customer Information (please print)

Name: \_\_\_\_\_

Mailing Address: \_\_\_\_\_

Facility Location: \_\_\_\_\_

Phone: \_\_\_\_\_

Company Customer Account: \_\_\_\_\_

### Section 2. Generation Facility Information

System Type: Solar, Wind, Hydro, Geothermal, Biomass, Fuel Cell, Micro Turbine (Circle Type)

Generator Rating (kWH): AC or DC (Circle One) Size: \_\_\_\_\_

Inverter Manufacturer: \_\_\_\_\_

Inverter Model: \_\_\_\_\_

Inverter Location: \_\_\_\_\_

Inverter Power Rating: \_\_\_\_\_

### Section 3. Installation Information

Attach a detailed electrical diagram of the net metering facility

Installed by: \_\_\_\_\_

Mailing Address: \_\_\_\_\_

City/State/Zip Code: \_\_\_\_\_

Daytime Phone: \_\_\_\_\_

Installation Date: \_\_\_\_\_

**Section 4. Certification**

1. The system has been installed in compliance with the local Building/Electrical Code of Clarksville, AR.

Electrical Inspector Signature: \_\_\_\_\_ Date: \_\_\_\_\_

2. The system has been installed to my satisfaction and I have been given system warranty information and an operation manual, and have been instructed in the operation of the system.

Owner Signature: \_\_\_\_\_ Date: \_\_\_\_\_

3. The System has been installed in compliance with the Clarksville Connected Utilities.

Utility Inspector Signature: \_\_\_\_\_ Date: \_\_\_\_\_

4. The Net Meter has been installed and verification of alternative power production was verified.

Meter Technician Signature: \_\_\_\_\_ Date: \_\_\_\_\_

5. All signatures have been acquired and I hereby acknowledge system operation has begun.

Electric Department Manager Signature: \_\_\_\_\_ Date: \_\_\_\_\_
